Even if we have a computer with limited capabilities or is quite old, we can install a lightweight antivirus which doesn't use much of the system's resources.. Work has used Norton in various flavors and names Avast did well by me in Windows and if I had to have one now for OS X it might be what I use if it weren't for Clam and ClamXav (ttp://).. They suggest I use McAfee shudders I want the lightest AV possible, something that will use as few resources as possible.. Avast Free Antivirus for Mac Adaware Antivirus Free is one of the most popular antivirus software out there.. ClamXav now costs but when I last upgraded to 2 3 6 it was still free Still \$30 is not a lot and I may go ahead and purchase a license as I like and use it. [Courage The Movie Christian Movie](#)
